

AGRICULTURE

BUILDING CONCEPT

WITH A PAST,
A PRESENT AND
A FUTURE.

Success stories often have a simple start. On the west coast of Sweden, the salt-saturated rain and wind went hard on buildings and equipment stored outdoor. There was a need for durable and rational shelter solutions. In 1972 a local entrepreneur took up the challenge, and the LLENTAB hall was born. Over time, "LLENTAB" has become a byword for steel buildings. Now we are becoming a synonym for far more than steel buildings.

A SMART, SUSTAINABLE PROCESS WITH HIGH PRECISION AND FLEXIBILITY.

Into our plant goes high quality sheet steel. Out come the trussels, panels and profiles that in 15 weeks will become the steel base for your business. Every part is calculated, customised and double-checked to suit your specific building.

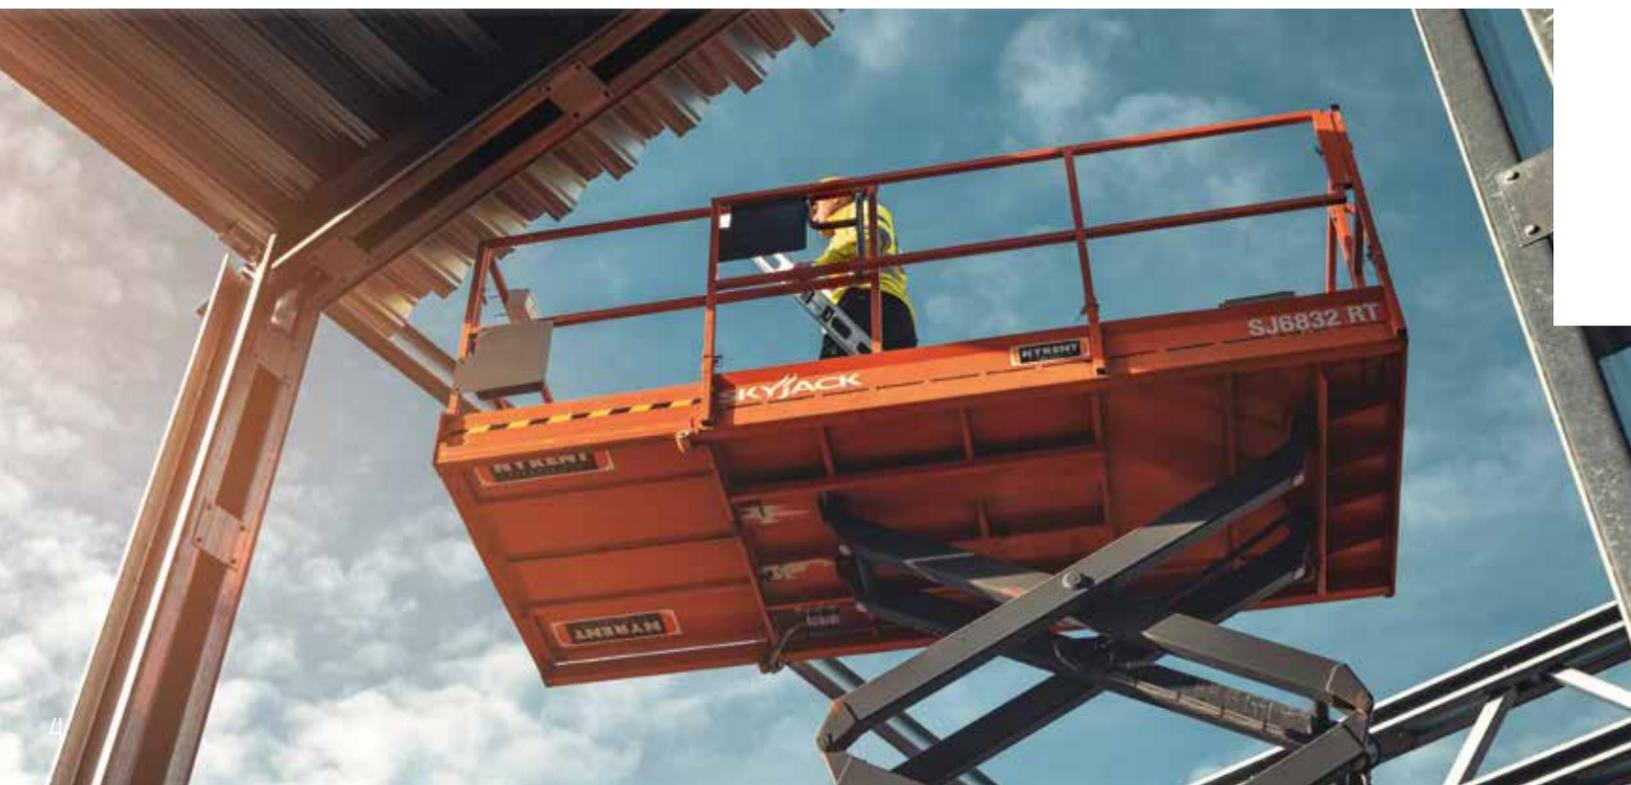

Following our standardised ten-step process, we design and construct our products with our own staff in our own facilities and we transport and assemble our halls on the European market in close contact with clients, partners and contractors.

We finalise on an average one building every day, more than 300 projects a year and in total more than 10,000 projects so far. This can not be achieved without a very trimmed business model and a superior pre/after-sales service organisation.

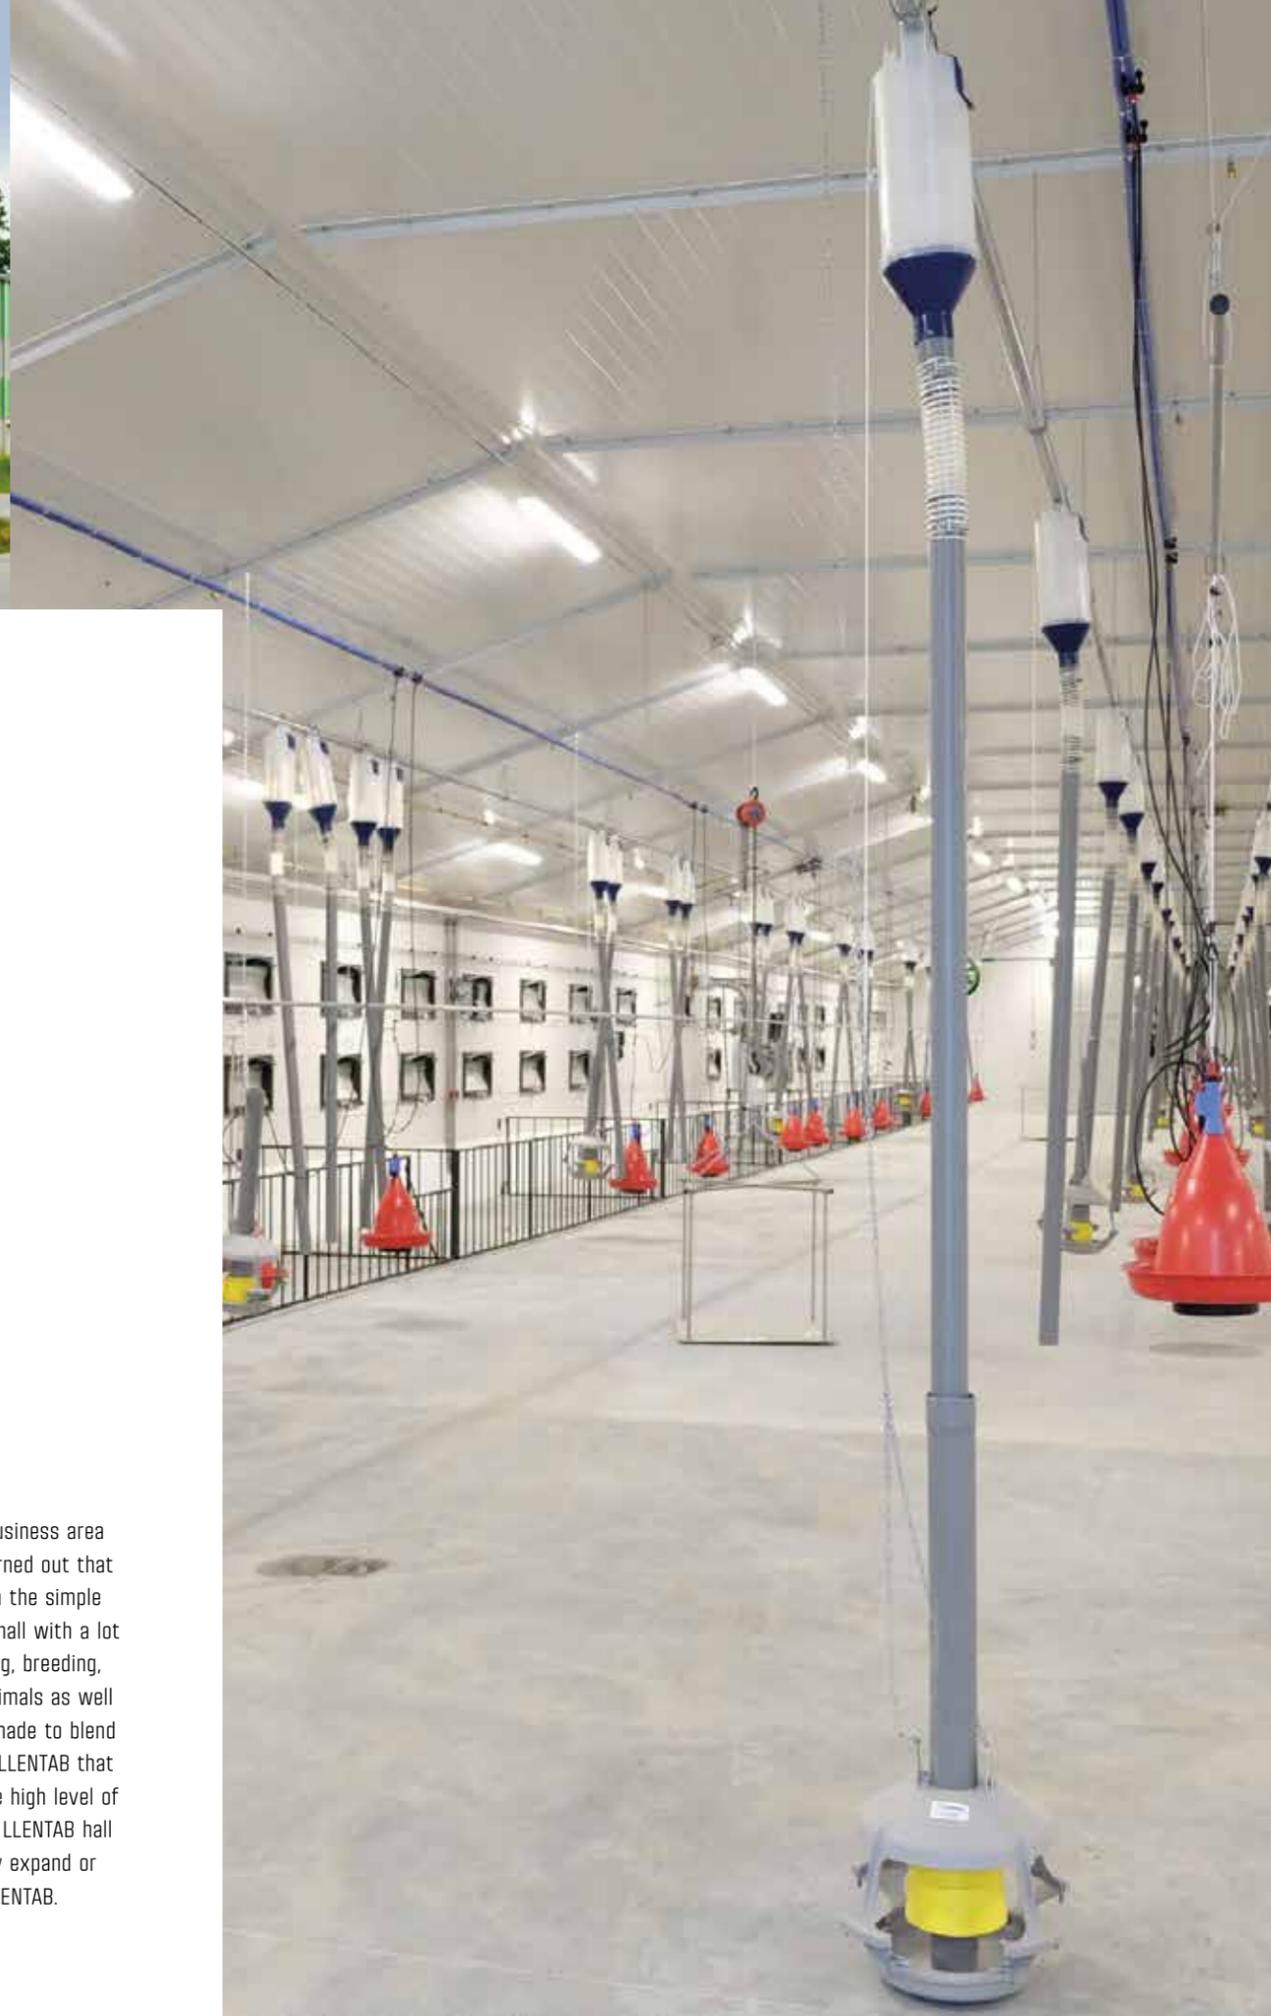

The LLENTAB concept will continue to develop into MORE THAN STEEL BUILDINGS - our focus now is to provide extended management support and thus bring value-added to our customer.

SUSTAINABLE STEEL

Building an entire hall from steel means that the building is sustainable, since steel is a material that can be 100% recycled. The LLENTAB method, with rebated galvanised steel profiles, further minimizes impact on the environment, since it reduces the amount of steel material used by 20% compared to a conventional steel frame. Our efforts to keep our process environmentally friendly is explained in detail on our website, www.llentab.com.

WE ARE FINALISING ONE OF OUR BUILDINGS SOMEWHERE IN EUROPE EVERY DAY.

PREPARING FOR A GOOD HARVEST.

Farmers often think long-term. Investments in machinery, equipment, land and farm buildings are the seeds for future harvest and may not yield in years. This affects decision-making in a business that heavily rely on unpredictable factors like the weather and climate, the global trade with foods and grains and changing consumer habits. As a consequence, it is of vital importance that both equipment, crops, livestock and feed have sufficient space and protection and those buildings have a long life span and provide the best and most cost-efficient preconditions for a rational and safe handling of everything stored inside. Just as in any modern industry.

Buildings for agriculture have been a major business area for LLENTAB since the very beginning as it turned out that our flexible concept is ideal for farming: From the simple rain shed to the complex insulated livestock hall with a lot of integrated functionality for handling feeding, breeding, climate and hygiene for the benefit of the animals as well as their caretakers. And the building can be made to blend well into the rural landscape, A dimension to LLENTAB that comes close to the heart of the farmer is the high level of sustainability, firmly built into the concept. A LLENTAB hall is 100% recyclable, but also possible to easily expand or dismantle and rebuild. A unique feature for LLENTAB.

5 GOOD REASONS TO CHOOSE A LLENTAB AGRICULTURE HALL

COVERS LARGE AREAS EFFECTIVELY

With a possible free span of over 100 m, a LLENTAB hall can be erected without supporting pillars that inhibit the functionality and ease of moving vehicles and bulk loads.

ADAPTS TO NEEDS

A LLENTAB hall can be just an uninsulated rain protection and it can be the daily living habitat for both animals and farmworkers.

STANDS THE TEST OF TIME

The early LLENTAB farming halls from the 70's and 80's still stand and deliver to their owners. Improvements over time further guarantee a hall that will not flaw in a lifetime. We have also proven ourselves to be a very viable partner who can stand by our clients over time and offer advice and services over the decades.

SUPPORT AND SPEED

We know that farming is a hard job in itself and that project management should not be a burden to the farmer. We supervise the layout and the construction of your farm hall in a short time frame.

NEXT GENERATION. AND NEXT.

Within agriculture, the land and the business is often passed on through the generations. No one can with accuracy predict the rapidly changing needs for next year, let alone the coming 10-20 years. To have a flexible mindset towards your farm layout is to have a LLENTAB mindset.

AS FLEXIBLE AS THE WEATHER: A FARM BUILT ON A LLENTAB FRAMEWORK.

As you can see, our concept can easily adjust from small and simple to large and heavily specialized. We have the skills and experience from many other fields of business to think beyond tomorrow. The framework of a LLENTAB hall is basically identical in everything we build, but the exterior and the interior can make your hall look and work as virtually anything you desire. Look for yourself! Our website offers a selected reference database where you can browse and find farm buildings in all our European markets, and you can draw inspiration from other types of buildings as well. Or simply contact us and tell us what space and use you need and let us come up with a well-proven and cost-efficient solution. We may also be able to link you to someone who has had a similar challenge.

COOPERATION TURNING INTO LASTING RELATIONS

TO DATE, WE HAVE DELIVERED MORE THAN 300 AGRICULTURAL BUILDINGS IN OUR EUROPEAN MARKET. IT IS ALMOST ALWAYS THE RESULT OF VERY SUCCESSFUL COOPERATION BETWEEN INVESTORS CONTRACTORS AND US. HAVING EXPERIENCED THE BENEFITS AND THE EASE OF WORKING WITH US, PEOPLE ARE INCLINED TO COME BACK. IT IS NOT UP TO US TO EXPLAIN WHY OUR CLIENTS ARE SATISFIED WITH OUR DELIVERY. INSTEAD, WE SIMPLY LET SOME OF OUR AGRICULTURAL HALL CLIENTS TELL YOU IN THEIR OWN WORDS IN THE FOLLOWING PAGES.

FIRST STEP TO A LLENTAB STEEL HALL

We strive to be strong locally and to meet our current and future customers with short notice. Our regional representative is your first point of contact and the person to lead you through the process towards a new agriculture hall. The regional representative is also the access point to all the LLENTAB competence regarding design, technical and legal matters and everything else that concerns the complexity of building for the future.

LET'S MEET AT YOUR PLACE

From our regional offices we meet with clients and prospects daily.

You will find all updated contact information on www.LLENTAB.com.
